STATEMENT OF SUBSTANCE OF INTERVIEW

Sir:

Applicants would like to thank Examiner VINOD D. PATEL for the personal interview conducted on November 6, 2006 with applicants' representative Paul FENSTER, and the interview summary given to applicants' representative on same date.

For the record applicants submit the following statement of the substance of the interview:

The examiner and applicants' representative met and discussed two prior art references which were not on record but have been brought informally to the attention of applicants' representative.

Applicants' representative pointed out to the examiner that the claims included a limitation of an elongated element heated to a temperature capable of cutting hair. Applicants' representative further argued that the prior art references provided no way of avoiding burning of the skin and the heat capacity of the heated element in the prior art references was such that heating the element to the temperature that would cut hair would inevitably also burn the skin. It was therefore not possible that the prior art reference implied anything other than minor amount of heating, incapable of cutting hair.

The Examiner agreed to consult with his supervisor and issue an action in response to the amendment filed on August 8, 2006.

Respectfully submitted,
Pinchas SHALEV, et al.

A handwritten signature in cursive script, reading "Paul Fenster", is positioned above a horizontal line.
